

Golf Course Management

The Segway x2 Golf: The Most Innovative Way to Cruise the Course

Is your course ready to differentiate itself and improve round throughput? The Segway® x2 Golf is the way to do it! The Segway® x2 Golf features the latest technology to set your course apart from the rest. We are confident that offering the Segway® x2 Golf on your course will create a fun and innovative reputation, speed up play, and best of all – save on costly turf maintenance.

“Market research has shown that in the golf business you must differentiate your facility, develop programs that encourage loyalty to the club, and continually seek to make the game more fun in order to be successful. Having Segway x2 Golf units at our facility satisfies all three criteria, making it the perfect investment.”

Bob McGrath, General Manager, San Jose Municipal Golf Course, 2007

Gentle on the turf

Looking to score points with the grounds keeper? An independent research study conducted by the Universities of Arkansas and Tennessee in fall 2007 proved that the Segway x2 is much friendlier to turfgrass. The Segway x2 Golf significantly outperformed a traditional golf cart in measurements of turf quality, cover, and surface hardness.

Uniquely designed for the avid golfer

The x2 Golf is a specially-configured version of the Segway PT for use on the course. It features smooth low pressure tires, a golf bag carrier, and a scorecard holder to carry everything needed for a round. Best of all, it uses the same balancing technology as the standard Segway PT, recently enhanced with new LeanSteer™ capability. It's easy to learn and fun for golfers to ride. You'll quickly find that your course becomes recognized as an innovation leader with the introduction of the x2 Golf.

Bring your clubs with you

The x2 Golf gives players greater flexibility in maneuvering the course and easily allows players to travel together as a foursome or alone. Players can travel independently to their ball which cuts time waiting for others. Plus there will be no more walking back and forth to the cart to change clubs - all clubs go right along with each golfer.

Play a full round or two

The x2 Golf runs on two powerful lithium-ion batteries. They pack enough juice to carry a golfer for up to 36 holes of golf* and they're made from a safe phosphate-based compound that has different properties from the lithium-ion batteries used in notebook computers and cell phones. With the increased efficiency of a round played with the x2 Golf, you'll find your members playing more rounds in less time.

*Range varies depending on payload, terrain, and riding style.

The social game reinvented

Golfers on Segway PTs can all ride alongside each other and still carry on a normal conversation. The Segway PT gives them the freedom to go directly to their lie, assess the shot as they approach, quickly take a shot, and then rejoin their group to enjoy the social aspects of the game. Players also enjoy being able to quickly and quietly pull ahead to find a ball or peek around a dogleg while another player sets up to take his or her shot. The x2 Golf lets golfers enjoy the freedom and flexibility of individual play as well as the camaraderie that is such an integral part of the game.

x2 Golf

Compared to a golf cart, this is a transportation hole-in-one: compact, fun, and easy to maneuver. The x2 Golf package includes low-pressure tires that barely disturb the turf, a scorecard holder, and a bag carrier that automatically positions your clubs upright after you step off.
